

ABC

Head Start Society

About Us

For over 30 years, ABC Head Start has offered a unique and strong family based program. We provide early learning, family and community supports to families living on a limited income.

ABC Head Start families are provided opportunities to be included in their children's learning. We work together with families and community agencies to create positive learning and life experiences.

ABC Head Start employs over 100 staff within multidisciplinary teams that include teaching staff, social workers, speech language pathologists and home educators. Along with volunteers, community partners and supporters; ABC Head Start creates strong communities for the future.
